CONTENTS

The Proceedings of the Seventh International Working Seminar on Production Economics

Preface
R.W. Grubbström (Linköping, Sweden) and H.H. Hinterhuber (Innsbruck, Austria) 1

Production Planning and Control

Production control in engineer-to-order firms
J.W.M. Bertrand and D.R. Muntslag (Eindhoven, The Netherlands) 3
The influence of central government's policy on production and the inventory in a spatial oligopoly
M. Bogataj and L. Bogataj (Ljubljana, Slovenia) 23
Capacity smoothing and sequencing for mixed-model lines
M. Decker (Mannheim, Germany) 31
Simulation of pull type manufacturing system for evaluating maintenance planning
S. Durmusoglu (Istanbul, Turkey) 43
Integrating marketing and production planning in Make-To-Order companies
B. Kingsman, L. Worden, L. Hendry, A. Mercer and E. Wilson (Lancaster, UK) 53
Manufacturing flexibility and profitability
J. Olhager (Linköping, Sweden) 67
Feedback production planning in a stochastic two-machine flowshop: Asymptotic analysis and computational results
S. Sethi, H. Yan, Q. Zhang and X.Y. Zhou (Toronto, Canada) 79
Manpower capacity planning – A hierarchical approach
B. Wild and C. Schneeweiß (Mannheim, Germany) 95
Production planning and control (PPC) systems including load-oriented order release – problems and research perspectives
G. Zäpfel and H. Missbauer (Linz, Austria) 107
Process planning for a modular component placement system
W.H.M. Zijm and A. van Harten (Enschede, The Netherlands) 123

Theoretical Approaches

Capacitated lot-sizing with minimum batch sizes and setup times
E.J. Anderson and B.S. Cheah (Cambridge, UK) 137
Initial order quantities in a multistage production system with backlogging
R.W. Grubbström and H. Ding (Linköping, Sweden) 153
Measuring and improving planning stability of reorder-point lot-sizing policies
T. Jensen (Bielefeld, Germany) 167
Optimal and approximate (Q, r) inventory policies with lost sales and gamma-distributed lead time
S.G. Johansen (Aarhus, Denmark) and A. Thorstenson (Linköping, Sweden) 179
A theoretical framework for understanding why JIT reduces cost and cycle time and improves quality
J. Miltenburg (Hamilton, Canada) 195
Different evaluations of 'criticity' in production processes
L. Poiaga (Milan, Italy) 205
A capacitated single-item lot-size model
K. Rosling (Linköping, Sweden) 213
Heterogeneous batch structures in throughput scheduling
P.J. Weeda (Enschede, The Netherlands) 221

Strategic Planning for Production Systems

Industrial conversion to natural gas – An efficient and risk neutral strategy?
B. Andersson and T. Lindblom (Gothenburg, Sweden) 229
The challenges of capacity planning
N.A. Bakke (Hannover, Germany) and R. Hellberg (Linköping, Sweden) 243

Engineering design and product development and its relationship to manufacturing: A programme of case study research in British companies
P.M. Braiden, N. Alderman and A.T. Thwaites (Newcastle upon Tyne, UK) 265
Manufacturing practice in a transition economy
A. Chikán and K. Demeter (Budapest, Hungary) 273
Integrated performance measurement. A review of current practice and emerging trends
M.J. Gregory (Cambridge, UK) 281
What makes a strategist out of a manager? What engineers should know about strategic management
H.H. Hinterhuber and W. Popp (Innsbruck, Austria) 297
Design of the decision process for strategic investment in advanced manufacturing systems
C. O'Brien and S.J.E. Smith (Nottingham, UK) 309
Operational technology transfer: Can we calculate the behavioral costs?
S. Palaniswami and R.C. Bishop (Mount Pleasant, MI, USA) 323
The analytic hierarchy process based expert analysis of strategies and critical success factors of forest industries in Finland
M. Tuominen (Lappeenranta, Finland) and P. Sierilä (Helsinki, Finland) 331

Production Information Systems

Progress on developing a framework for computer aided production management
M.C. Bonney and M.A. Head (Nottingham, UK) 345
Architectural framework for the design of a simulation environment for decentralized production management
Chr. Kruse, M. Zell and A.-W. Scheer (Saarbrücken, Germany) 355
Decentralized production planning and design of a production management system based on an object-oriented architecture
M. Rohloff (Munich, Germany) 365

Quality Planning and Control

Quality of services "applicable to production?"
C.P.M. Govers (Eindhoven, The Netherlands) 385
Improving service quality: Learning from manufacturing
R.N. Mefford (San Francisco, CA, USA) 399
Inventory control and quality system requirements case study
U. Moisio and V.-M. Virolainen (Lappeenranta, Finland) 415

Production Pricing and Costing

Analysis of the conversion from a job shop system to a cellular manufacturing system
M.B. Durmusoglu (Istanbul, Turkey) 427

DSS and Expert Systems in Production

Using a knowledge-based decision support system development environment to implement a scheduling system for a workshop
M. Klein (Jouy-en-Josas, France), C. Lecomte (Châtenay-Malabry, France) and P. Dejax (Châtenay-Malabry, France) 437
An expert system for a local planning environment
G.J. Meester (Enschede, The Netherlands) 453

Investment and Financial Planning

The appraisal of industrial investments: A new method and a case study
P. Gallo and L. Peccati (Turin, Italy) 465
Post-implementation reviews of investment: Evidence from a two-stage study
E.J. Morgan and Y.L. Tang (Bath, UK) 477

Inventory Control

An integrated approach to the layout of flexible transfer lines (FTLs): Buffer Stocks Allocation
L. Abdel-Malek and C. Tang (Newark, NJ, USA) 489

Determining the number of spares in an inventory/repair system which supports equipment with scheduled usage
M.S. Bridgman (Washington, DC, USA) and C.A. Mount-Campbell (Columbus, OH, USA) 501
The economic lot size and relevant costs
M. Corbey and R. Jansen (Eindhoven, The Netherlands) 519
Determining economic inventory policies in a multi-stage just-in-time production system
A. Gunasekaran (Vaasa, Finland), S.K. Goyal (Montreal, Canada), T. Martikainen (Vaasa, Finland) and
P. Yli-Olli (Vaasa, Finland) 531
Inventory control of repairable tools with incomplete information
T. Hamann and J.-M. Proth (Metz, France) 543
Reducing system nervousness in multi-product inventory systems
E. van der Sluis (Amsterdam, The Netherlands) 551
Global relations between inventory, manufacturing lead time and delivery date promises
G. Vastag and D.C. Whybark (Chapel Hill, NC, USA) 563

Transportation and Logistics

Freight rates for small shipments
F.J. Arcelus and J.E. Rowcroft (New Brunswick, Canada) 571
Scheduling of packaging lines in the process industry: An empirical investigation
P. van Dam, G. Gaalman and G. Sierksma (Groningen, The Netherlands) 579
A practical solution to a newspaper distribution problem
R.J. Mantel and M. Fontein (Enschede, The Netherlands) 591

Author Index 601
